

Rocket Science

3 DVD Special Collector's Edition

An exciting new 12 part series examining the frontiers of rocket science and space discovery.

Winner of the Houston Film Festival Gold Rose

Rocket Science takes an inspired look at the history of space exploration. Through personal interviews, never-before-seen film footage, and classified tours of top-secret facilities. Rocket Science investigates the most exciting moments in the race to reach space. Some of science's most significant breakthroughs are highlighted... everything from building the first rockets, to Chuck Yeager breaking the sound barrier and Neil Armstrong landing on the moon.

Colorful commentary and personal anecdotes from the people who influenced and shaped space flight add a captivating element of human drama to this unique series. Just a few of the exclusive interviews include: Walter Cronkite, Chuck Yeager, Scott Crossfield, James Lovell, Frank Borman, Gene Cernan, Wally Schirra and Gene Krantz.

Rocket Science also visits a variety of locations where groundbreaking research and advancements in aerospace technology took place. These include the legendary Jet Propulsion Laboratory, the facility responsible for developing the first American satellite and most of the later planetary space probes; Lovelace Clinic, the training and testing ground for NASA astronauts; and Edwards Air Force Base, the site where the sound barrier was first broken.

**Over 9 hours
of exciting
exploration**

DISC ONE

THE ROCKETEERS

Before NASA, the rocket plane was the preferred route to space

THE LAST EMPTY SKY

The development of the rocket 1920 to 1957

THE HIGH GROUND

The race to launch something - anything into orbit

MERCURY RISING

The race to launch the first human into space

DISC TWO

MISSILES TO THE MOON

Kennedy issues the challenge

THE LEARNING CURVE

NASA invents space travel with Project Gemini

GO FEVER

The disaster of Apollo One puts NASA on track for the moon

TEN TIMES FASTER THAN A RIFLE BULLET

The birth of the Saturn V

DISC THREE

WE CHOOSE TO GO TO THE MOON...

The slow and painful birth of the first true spaceship, and a Christmas voyage around the moon

BEFORE THIS DECADE IS OUT

Apollo 11 and the first steps on the moon

THE UNIVERSE STRIKES BACK

Apollo 11 had been a near miss. 12 and 13 were near-disasters

THE LAST MAN ON THE MOON

The era of the Space Cowboy comes to an end
